

**Hitachi Solutions Partners with Sibintek to Distribute Location Intelligence Solutions**  
*Launching GeoPDF distribution in the Russian Market*

TOKYO, 09/28, 2012 — Hitachi Solutions, Ltd. and L.L.C. Sibintek (Sibintek) today announced that they start to distribute GeoPDF solutions for the Russian market. GeoPDF is a technology developed by TerraGo Technologies, Inc. and Hitachi Solutions is a master distributor of their products localized for Russia. Hitachi Solutions and Sibintek have signed an agreement for distributing GeoPDF solutions with a view to cooperatively promote location intelligence solutions in Russia.

In Russia, GIS is widely used in a range of fields and there is a high demand for utilizing geolocation information in the Oil & Gas industry since each company owns a number of facilities and pipelines to manage and maintain all around the country. GeoPDF is an easy-to-use GIS solution which converts geospatial data to the PDF format preserving its location information (e.g., longitude, latitude). Since GeoPDF does not require special skills to manipulate, it enables anyone in the enterprise to access and utilize their geospatial data for making their decisions in their daily operations, especially when they are out in the fields.

**TerraGo Product Features**

| Component | Features   |
|-----------|--|
| Publish   | • Output GeoPDF files with layers of GIS location information and attribute data (such as addresses, place names and administration numbers) |
|           | • Output GeoPDF files from image files (GeoTIFF, etc.) that contain geographic information such as satellite imagery and aerial photography  |
| Compose   | • Consolidate multiple GeoPDF files to create single GeoPDF files with multiple layers   |
|           | • Create indexes in order to manage multiple GeoPDF files, such as for wide area maps  |
|           | • Create GeoPDF files with location information, from regular PDF files  |
| Utilize   | • Measure distances and areas  |
|           | • Add comments, photographs, and audio and video clips   |
|           | • Draw polygons, polylines and other shapes  |
|           | • Import comments and graphics from .shp, .kml, .kmz and .gpx file formats   |

| Component | Features  |
|-----------|---|
|           | <ul style="list-style-type: none"> <li>• Export comments and graphics to .shp and .kml file formats</li> <li>• GPS tracking using COM port</li> </ul> |

### **Release date**

Successive releases starting in September, 2012.

### **About GeoPDF Solutions**

GeoPDF solutions enable organizations to easily use geographic information without requiring specialized knowledge, by exporting GIS information to a PDF file format. More than 10,000 organizations use GeoPDF, with a core user base in the US, for diverse fields including security, crisis management, map distribution, and resource development and infrastructure maintenance such as by the oil industry.

GeoPDF solutions are developed by TerraGo Technologies of the US. Hitachi Solutions holds the rights to market GeoPDF solutions in 24 countries and regions including Japan and Russia.

### **About Hitachi Solutions**

Hitachi Solutions, Ltd. is based in Shinagawa Ward, Tokyo, and helps customers find solutions to the business challenges they face, as a comprehensive provider of value-driven services covering the entire IT life cycle—from systems planning to systems integration, operation and maintenance. In addition, Hitachi Solutions provides products and services that offer high added value to customers.

In the field of location intelligence, Hitachi Solutions provides satellite imagery services and GIS solutions for the Japanese and global market.

### **About Sibintek**

Sibintek is based in Moscow, Russia. As an experienced IT services provider, Sibintek offers a variety of IT solutions such as network services, outsourcing services, telecommunication services, as well as GIS solutions.
